Development of CIS statistics: dissemination of data on poverty and inequality

Aleksandr Kiryanov
Galina Selischeva

Expert group meeting on measuring poverty and inequality
Geneva, 28-29 November 2023.

Project "Development of CIS Statistics"

In 2023-2025. CIS Stat Committee implements the **Project "Development of CIS Statistics",** financed by the Government of the Russian Federation

Main ***Goals of the Project*:**

- Assistance to national statistical offices of CIS countries in statistical development
- Enhancing the capacity for comparative socio-economic analysis of CIS countries through improved statistical data consistency

Main ***Tasks of the Project* :**

- Development of statistical methodology and analyses
- **Digitalisation of statistics and use of alternative data sources**
- Strengthening the CIS statistical community

International statistical data and metadata hub

Subproject 2 "Digitalisation of statistics and use of alternative data sources"

International statistical data and metadata hub:

- ✓ data storage
- ✓ information and analytical system
- ✓ knowledge base on statistical methodology and classifications and open linked data system

International statistical data and metadata hub

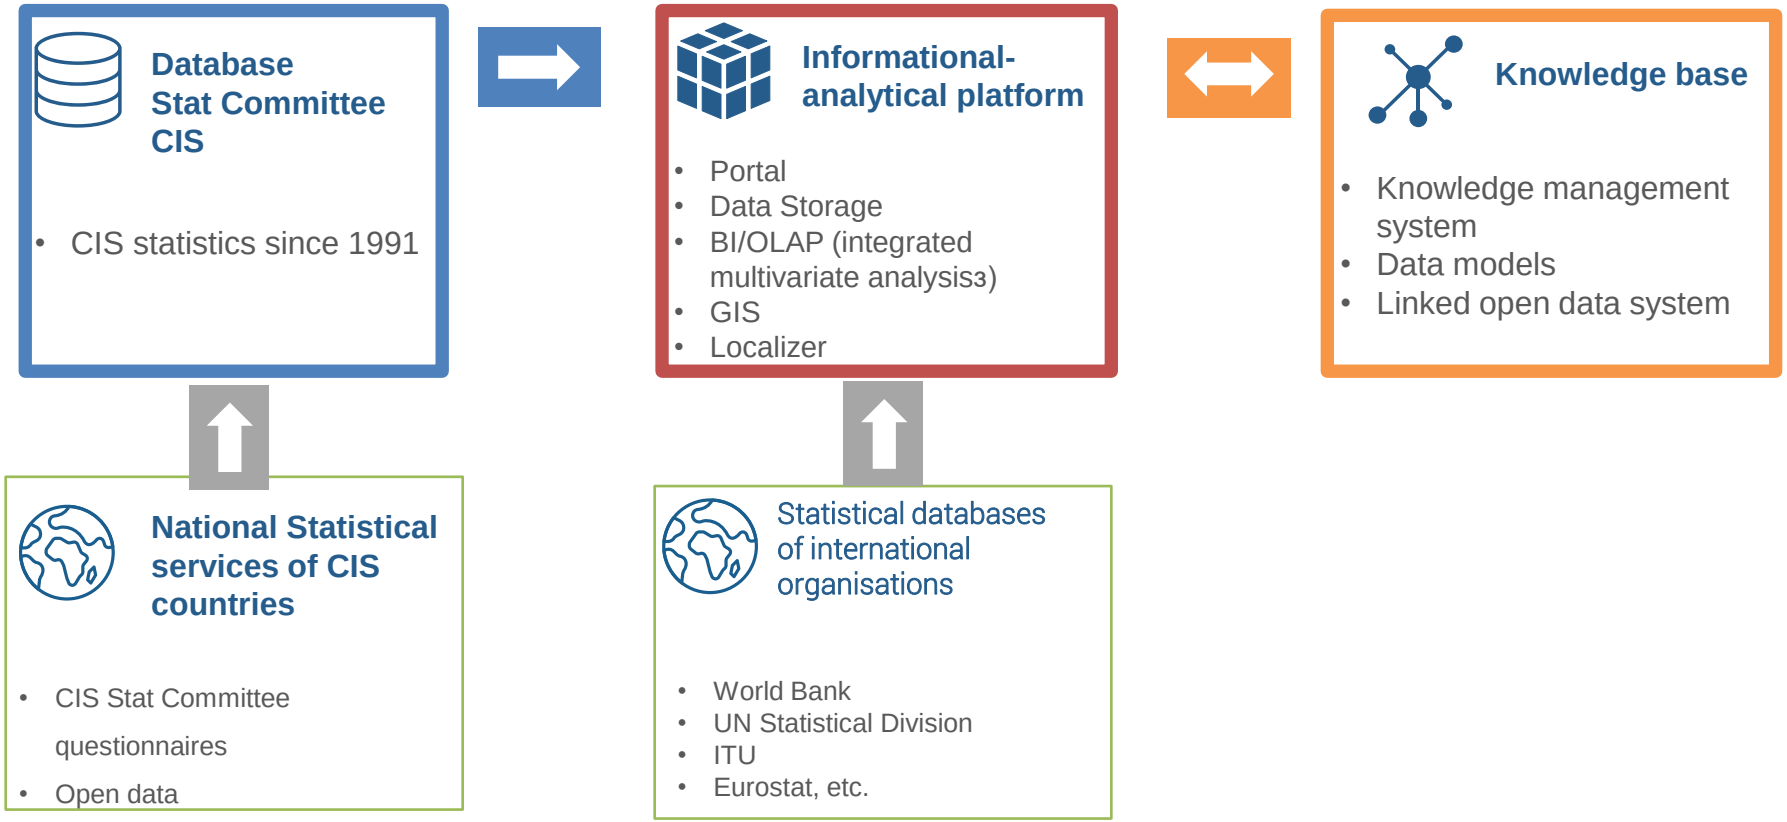
For users:

- single point of access to data collected by the CIS Statistics Committee, other global statistical resources (UN, IMF, World Bank, Eurostat, ITU, ...)
- on the same IT platform
- in Russian, English and languages of CIS countries
- interactive multidimensional analysis (with convenient visualisation), including geospatial data
- ability to upload data in modern formats ("smart metadata")
- more open, accessible statistics for users of all categories

For statisticians:

- Electronic library on methodology and classifications
- A tool for identifying and solving problems in the harmonisation of methodology and classifications

International statistical data and metadata hub



Data storage

Allows :

- Load data from databases, updating information regularly
- Add new material
- Create new indicators
- Classify data
- Aggregate data

Information and analytical system

Источники данных

Коннекторы

- Все типы баз данных
- Все типы форматов
- Специальные коннекторы для web-источников

Хранилище данных

- Исторические данные
- Классификация
- Агрегация
- API

Конструктор отчетов

- Без программирования
- Запросы
- Расчеты
- Визуализация

Переводчик

- Память переводов
- Искусственный интеллект
- Переводчики
- Computer Learning

BI портал

- Каталог показателей
- Интерактивные панели
- Поддержка всех устройств
- API

OLAP сервер

- Мгновенные многомерные вычисления
- Cube in-memory
- Параллельные вычисления
- Библиотека статистических алгоритмов

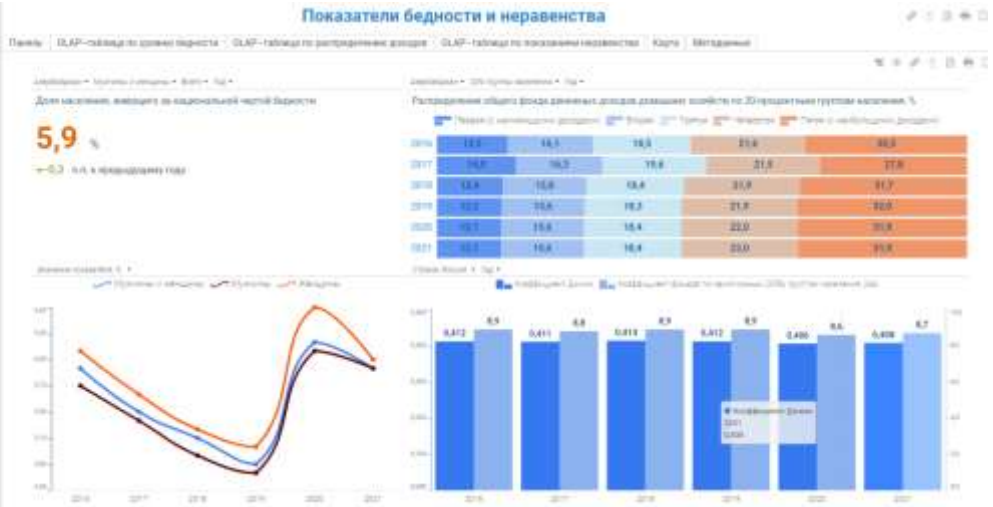
CIS Statistical Portal

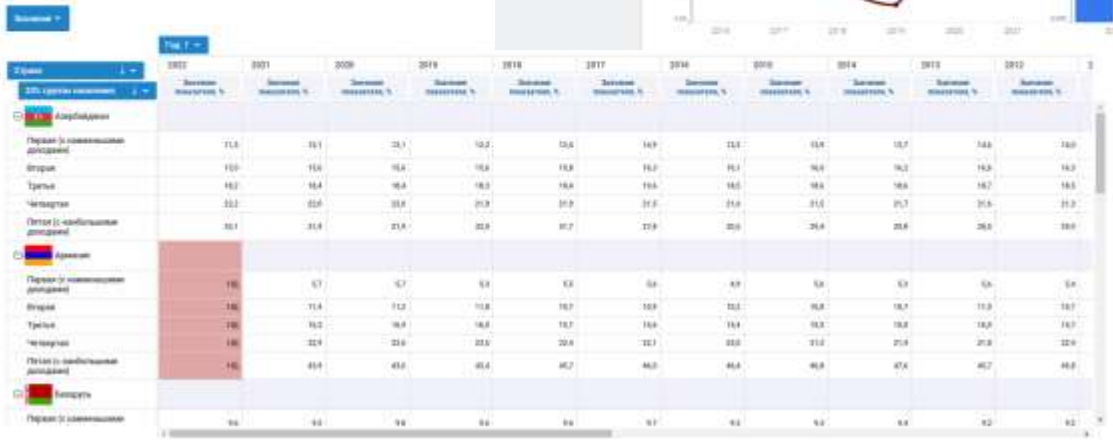
Статистика СНГ

Международная статистика

Микромоделирование

Poverty statistics on the CIS BI portal





Knowledge base on statistical methodology and classifications

- Glossaries
- Methodology
- Harmonisation
- Indicators and datasets
- Information and analytical reviews

Unified information and analytical system

Knowledge Management System (KMS)

System for the production and dissemination of Linked Open Statistics (LOSS)

- InterpretationAnalysisVisualisationComparison
