INTERSTATE STATISTICAL COMMITTEE
OF THE COMMONWEALTH
OF INDEPENDENT STATES

HEALTHCARE IN THE CIS COUNTRIES

Healthcare in the CIS countries 2021–2024. Concise statistical abstract / Interstate Statistical Committee of the Commonwealth of Independent States /. - M.: 2025.

Interstate Statistical Committee of the CIS was formed in 1992 pursuant to the decision of the Heads of Governments of the CIS member states of December 30, 1991.

Based on the UN General Assembly Resolution A/RES/48/237 of 30.03.1994, which granted the Commonwealth of Independent States an observer status under it, the CIS-Stat participates in the work of the UN Statistical Commission, UNECE Conference of European Statisticians and its Bureau, ESCAP Committee on Statistics, is a member of the Committee for Coordination of Statistical Activities, which consists of more than forty international statistical organizations.

Having the status of international statistical organization and relevant authorization from the Council of Heads of Statistical Services of the CIS Countries, the CIS-Stat has ample opportunities to support the interests of the national statistical services of the region in various international projects.

The abstract contains the main indicators characterizing the state of healthcare in CIS countries: healthcare system personnel and infrastructure, morbidity, including selected reasons, medical care accessibility and care for women, and set of disability indicators.

The publication is intended for specialists in the field of social policy, demography, economists, statisticians, businessmen and the media.

Data for Moldova exclude the information on the territory of the left bank of Dniester river and Bender city.

In some cases, minor discrepancies between the total and the sum of the components are explained by rounding of the data.

More detailed information on the CIS countries is available in the database of the CIS-Stat:
