Statistical Journal of the IAOS

Journal of the International Association for Official Statistics

Introduction and Overview of the SJIAOS

II International Statistical Forum of the CIS:
October 2-4, 2024 - Tashkent

Mission of the SJIAOS

The SJIAOS is the flagship journal of the International Association for Official Statistics.

Its main aim is to support the IAOS mission by publishing articles to promote the understanding and advancement of official statistics and foster the development of effective & efficient official statistical services on a global basis.

The Journal is used more and more as a reference document and a voice for official statisticians (NSOs and International Organizations) throughout the world.

At the same time, the Journal tries to reach out to non-official statisticians and become a source of knowledge for non-experts

New Cover of the Journal

Statistical Journal of the IAOS

Quarterly Journal of the International Association for Official Statistics

Special themes:

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis

Editorial Board

The Editorial Board (EB) comprises 40 Editors covering all the main statistical domains covered by Official Statistics and new domains, such as Data Science, Big Data and new Data Sources, Artificial intelligence and Machine Learning.

Temporary guest editors are nominated to manage Special Issues of the Journal.

Members of the EB are: Stephen Penneck, Vice President of the ISI and ex-President of the IAOS; Steve MacFeely, Chief Statistician OECD; Angela Me, Chief Research and Trend Analysis Branch, UNODC

Currently over 33% of the editors are women and almost 30% of them are from developing regions.

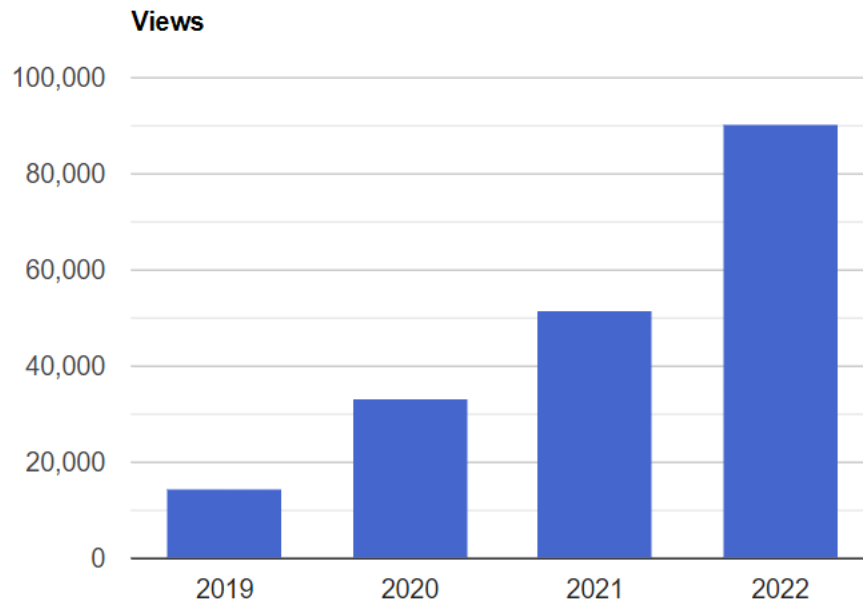

The Editors have two main roles;

- Organize the review process of the articles submitted to the Journal and ensure the quality of publication;
- Promote the Journal in relevant Conferences and at the same time search for high quality articles or propose Special Issues.
