Goskomstat attaches particular importance to expanding the use of satellite imagery data for official statistics and is working in this direction. For this purpose, joint work is underway with the Space Agency of the Republic of Azerbaijan (Azercosmos).

USING SATELLITE IMAGE DATA

6.6.1

- Dynamics of changes in the area of water-related ecosystems

11.3.1

- The ratio of building rates and population growth rates

14.1.1

- (a) Coastal eutrophication index and (b) Scrap plastic density

15.3.1

- The ratio of the area of degraded land to the total land area

The draft "State Program for the development of official statistics in the Republic of Azerbaijan in 2026-2030" includes an event entitled "Expanding the use of satellite imagery in the preparation of official statistical data." As a result of the implementation of the event, data will be prepared jointly with the Space Agency of the Republic of Azerbaijan on several indicators (SDGs 6.6.1; 11.3.1; 14.1.1; 15.3.1, etc.). The event also includes the preparation of a number of statistics related to agriculture and the environment based on satellite imagery.
